First Votes, First Games : America's Biggest Week of the Autumn

By The Lucerna newsroom • Reading level : A2

Election Day is Tuesday, November 3. But in much of America, the election has already started. This Monday, October 19, early voting opened in Texas — and in Alaska, Arkansas, Connecticut and Colorado too. Millions of people are asking the same questions : where do I vote, and when ?

Early voting is simple : you go to a voting place before Election Day, you show your ID, you mark your ballot, and your vote counts on election night. No November lines, no problem if you work on Tuesdays. In Texas, it runs from October 19 to October 30.

And that is only half of the week. On Tuesday night, the new NBA season tips off. On Friday night, the World Series begins in Milwaukee. On Sunday, the fastest cars in the world race in Austin, Texas.

One thing is sure : this year, baseball will have a champion for the very first time. The Milwaukee Brewers and the Tampa Bay Rays have never won the World Series. One of them will win it now. Our sport dossier is on page 4.

This is the first issue of The Lucerna in English. Every week, we read America's real life with you — slowly, clearly, and always from the week's real news. Welcome !

Social Security Checks Grow by 3.6% in January

By The Lucerna newsroom · Reading level : A2

Good news for nearly 72 million Americans : on Wednesday, October 14, the Social Security Administration announced a cost-of-living adjustment — a « COLA » — of 3.6% for 2027. From January, the average retired worker will get about 75 dollars more every month.

Why do the checks grow ? Because life costs more. When the prices of food, homes and energy go up, the checks go up too — that is the idea of the cost-of-living adjustment. Workers on SSI, a second program for people with very low incomes, see their increase a little earlier : on December 31, 2026. About 7.3 million people receive SSI.

When will you see your number ? Personal notices come online at the end of November, and by mail in December. Every household does the same maths this week : 3.6% of my check is… how much, exactly ?

How is the number chosen ? Government statisticians follow the prices of a basket of everyday things — food, homes, energy, transport. When the basket costs more, the COLA rises. It is a promise written into the system : your check follows the cost of life.

Will 3.6% make anyone rich ? No. But for many households, 75 dollars is the difference between a hard month and an easier one — a full fridge, a warm house. That is why one small percentage is the week's biggest kitchen-table story.

The system is old. The first monthly check went to Ida May Fuller, of Vermont, on January 31, 1940. It was 22.54 dollars. In three years of work, Miss Fuller had paid 24.75 dollars into the system. She lived to be 100 years old, and in her long retirement she received more than 22,000 dollars in checks.

DO THE MATHS · 算一算

3.6% of $1,000 is $36. Of $2,000, it is $72. The average increase — about $75 — tells you the average check is a little over $2,000 a month.

CHECK YOUR FRIDGE !

Second story of the week — and it is in your kitchen. On Saturday, October 17, the US Department of Agriculture announced a big recall : about 1.58 million pounds of hot dogs, bacon and deli meats from one company, Kayem Foods. A cooler in the factory did not work correctly, and the food was not cold enough.

What must you do ? Do not eat the food. Throw it away, or take it back to the shop. At the time of the announcement, no illnesses were reported — but the rule with a recall is simple : when in doubt, throw it out.

How do you read a recall notice ? Look for three things : the name of the food, the dates on the packet, and the lot number — a code printed near the date. If your packet matches, it goes in the bin, not on the table. A recall sounds frightening, but it is also good news : it means the safety system works.

DID YOU KNOW ?

Nearly 72 million people receive Social Security money every month.

The first check, in 1940, was 22.54 dollars. The average increase in 2027 is about 75 dollars a month.

Notices arrive online in late November and by mail in December. Check your number !

AND YOU ? · 說說你自己

And you ? Is there a hot dog in your fridge today ? What money comes into your house every month ? Write two sentences in English and send them to the newsroom : the best ones will be printed in VOL.2 (page 7, « Readers' Corner »).

Halloween in America : a $13.5 Billion Night of Candy

By The Lucerna newsroom · Reading level : A2 → B1

On Saturday, October 31, America will put on its costumes. Halloween is not an official holiday — nobody gets the day off — but it is one of the biggest nights of the American year. This year, the National Retail Federation (NRF) projects record spending of 13.5 billion dollars, up 3.82% from 2025. That is about $115.14 for every person who celebrates.

Where does the money go ? Costumes come first : $4.4 billion. Decorations are second, at $4.3 billion — gardens full of skeletons, lights and giant spiders. Candy takes $4.1 billion, and almost everybody buys it : 96% of celebrants plan to buy sweets for the big night.

How does trick-or-treating work ? In the early evening, children in costumes walk from door to door in their neighbourhood. They ring the bell and shout : « Trick or treat ! » — a joke threat, always answered with candy. One rule matters : a light on the porch means « welcome, knock here ». A dark house means « please, not this year » — and children respect it.

The pumpkin is the symbol of the season. In October, families drive to pumpkin patches — fields where you choose your own pumpkin — and carve faces into them at home. A candle inside makes a jack-o'-lantern, and on October 31, thousands of orange faces glow on American porches.

What will America wear this year ? Google published its Frightgeist costume list on October 14, and the shop Spirit Halloween published its own : characters from KPop Demon Hunters and Toy Story 5, superheroes, and Greek gods. One number tells the story of 2026 : 47% of celebrants now use AI tools to plan a costume or a decoration. The robot helps you become a ghost.

Halloween was a national festival long before it was a shopping season. In the early 1900s, when telephones were still rare, Americans sent Halloween postcards — more than 3,000 designs were printed. The card on this page is from 1912. The greetings travelled slowly, by mail, and arrived like little paper ghosts.

This year, the calendar is kind : Halloween falls on a Saturday. No school the next morning, no work for most parents — the party can begin in the afternoon and the last jack-o'-lantern can burn late. Shops know it, too : the last full shopping week of the season is this one, and the costume shelves empty fast.

One object waits by every door : the candy bowl. Families fill it in the afternoon — chocolate, sweets, sometimes small toys — and children empty it, street by street, all evening. Economists study the $13.5 billion. Children study something simpler : which house gives the biggest chocolate ?

The Biggest Sports Week of the Autumn

By The Lucerna newsroom · Reading level : B1

TIP-OFF TUESDAY

The NBA is back. On Tuesday, October 20, the 2026–27 season opened with something new : a tripleheader — three big games in one night — on NBC and its streaming service Peacock. Boston played at Detroit, Oklahoma City at San Antonio, and in New York, the champions received their rings.

Before the game at Madison Square Garden, the New York Knicks raised their championship banner — the club's first since 1973. Then the Philadelphia 76ers spoiled the party. Philadelphia won 106–100, with 28 points from Tyrese Maxey. LeBron James, now a 76er, began a record 24th NBA season. The season continues all week : 43 games from Tuesday to Sunday, including the Lakers against the Warriors on Wednesday.

A FIRST-TIME CHAMPION

Baseball offers the week's most beautiful storyline. In the National League final, Milwaukee swept the Los Angeles Dodgers — the champions of the last two years are out. It is the Brewers' first World Series since 1982. In the American League, Tampa Bay beat Cleveland in Game 6 on Monday night.

So the World Series is Milwaukee against Tampa Bay. Game 1 is Friday, October 23, in Milwaukee (8 p.m. Eastern, on FOX), and Game 2 follows on Saturday. Here is the magic number : zero. Neither club has ever won the World Series — so for the first time in years, a first-time champion is guaranteed.

SPEED IN AUSTIN

On Sunday, the week ends at full speed : the United States Grand Prix at the Circuit of The Americas in Austin, Texas. Practice is on Friday, qualifying on Saturday, and the race on Sunday afternoon. The weekend is also a music festival : Maroon 5 on Friday, Post Malone on Saturday, Alesso on Sunday. A special « Grand PrixView » day opens the circuit to fans on Thursday.

One more name to watch : Victor Wembanyama, the French star of San Antonio, meets Oklahoma City in the third game of the tripleheader. In France, they will watch at breakfast time ; in Texas, it is prime time.

THE FOOTBALL WEEKEND

And football ? It never stops. Week 7 of the NFL season brings the Patriots at the Bears on Thursday night, then, on Sunday, the Packers at the Lions and the Chiefs at the Seahawks in the night game. College football fills Saturday : LSU at Auburn, Texas A&M at Alabama, Ole Miss at Texas, Indiana at Michigan.

AND AT 4 P.M. ON SUNDAY…

…the world game joins the party. Barcelona play Real Madrid in El Clásico on Sunday — 4 p.m. Eastern on ESPN in the United States. On Wednesday morning, « barca vs real madrid » was the number one trending search in the US in one snapshot.

Opening Week Lives on Your Phone

By The Lucerna newsroom · Reading level : B1

THE GAME COMES TO YOU

For fifty years, a big game meant a television in the living room. This week, the NBA opened its season in a new way : opening night was built as a tripleheader for NBC — and for its streaming service, Peacock. Three games, one night, every screen in the house.

Young fans do not always watch a whole game. Many meet the game first as a clip : forty seconds of the best moment, sent by a friend, watched on the bus. The full game comes later — or never. On Wednesday morning, one of the top trending searches in America was « lakers roster » : before watching the team, fans wanted the list of names. Who plays for the Lakers this year ?

AI PLANS YOUR COSTUME

Halloween is the other screen story of the week. The NRF counts a new habit : 47% of celebrants now use AI tools to plan a costume or a decoration. You describe an idea — « a Greek god, but funny » — and the machine offers ten versions. Then the group chat votes.

The costume itself is content now. A good costume is not finished when you put it on ; it is finished when the photo is posted. Google's Frightgeist list and the Spirit Halloween list agree on the stars of 2026 : KPop Demon Hunters, Toy Story 5, superheroes and Greek gods. This year, the gods have good lighting.

EARNINGS, IN PLAIN ENGLISH

On Wednesday, after the markets close, two giants publish their numbers : Tesla and Meta. Netflix and SpaceX did the same on Tuesday. « Earnings » is a company's report card : how much money came in, how much went out, and what is left — the profit.

For a few hours, every feed is green arrows and red arrows. One warning from our business desk : before the report, different experts give different numbers — nobody knows. After the close, everybody knows at the same time. That is the game, and this week, America is watching it live.

THE SECOND SCREEN

Watch a game with young fans and you will see two games at once. On the television, the match. On the phone, the second match : live statistics, polls — « Who wins tonight ? » — and the group chat, where every goal, every basket, produces twenty messages in ten seconds. The phone does not kill the game. For this generation, the phone IS part of the game.

The same phone plans the weekend. It holds the costume ideas, the AI pictures, the party address and the money for the pizza. One small glass rectangle runs the whole autumn : sport, money, festivals and friends. The Lucerna's advice ? Enjoy it — and sometimes, look up. The real game is also beautiful.

The Midterms : Why America Votes Early

By The Lucerna newsroom • Reading level : B2

On Tuesday, November 3, Americans vote in the midterm elections — the elections that fall in the middle of a president's term. There is no presidential race this year. Instead, voters choose the whole House of Representatives, part of the Senate, and most state governors. It is a smaller election than 2024, but in Washington, it changes everything.

The stakes fit in one line of numbers : the House today stands at 218 Republicans to 214 Democrats, according to Reuters — a margin of four seats. A handful of districts will decide who controls Congress for the next two years. That is why the advertising never stops : spending on election ads had already reached a record 3.8 billion dollars by October 12, the analytics firm AdImpact reported.

The newest fact of American elections is the calendar. Voting is no longer a day ; it is a season. Nurses, drivers, soldiers and parents often cannot queue for hours on a Tuesday, so states let them vote early, in person, with the same ballot. This year's wave opened on Monday, October 19, in Texas — early voting there runs to October 30 — and in Alaska, Arkansas, Connecticut and Colorado.

Louisiana and Missouri followed on Tuesday, Delaware and Maryland on Thursday, and Michigan and Florida's mandatory period begins on Saturday, October 24. Fifty states, fifty calendars : in the United States, elections are run by the states, not by Washington, and every state keeps its own doors and its own hours.

Early voting changes the campaign, too. Parties no longer aim everything at one Tuesday ; they aim at October. But one rule protects the suspense : early votes are counted under state rules, and the results, as always, arrive on election night. Voting early does not mean knowing early.

譯注｜講解｜midterm（elections）中期選舉 • the House 眾議院 • incumbent 現任者 • margin 差距 • turnout 投票率。

THE EARLY-VOTING WEEK

Mon, Oct 19 — Texas, Alaska, Arkansas, Connecticut and Colorado open

Sat, Oct 24 — Michigan opens ; Florida's mandatory period begins

Tue, Nov 3 — ELECTION DAY

HOW TO FOLLOW IT • 怎麼跟

Watch three numbers, not three hundred opinions : the turnout (how many vote), the House margin (218–214 today) and the ad money ($3.8 billion and counting). The rest is noise.

跟選舉看三個數：投票率、眾議院差距、廣告費。其餘多是噪音。

LEVEL A2 · 基礎

TELLING THE TIME

It's eight o'clock. · It's half past two. · It's a quarter to eight. For the hour, English always starts with « It's » — never « it has ». The three clocks on page 2 show the week's three times.

GOING TO + VERB

For a plan : « She is going to vote on Saturday. » be + going to + the verb, with no change. It is the friendliest future in English — use it for every plan of the week.

THE EXAMPLE · 例句

« Checks are going to grow in January. » — the Social Security story, from page 2.

LEVEL B1 · 進階

COMPARATIVES

Short adjective + -er + than : « Austin is hotter than Milwaukee. » Long adjective : more + adjective : « more convenient ». And good becomes better — never « more good ». Page 4 and page 6 are full of them.

THE PAST SIMPLE

Regular verbs add -ed : raised, watched. Irregular verbs change : win → won, sweep → swept, beat → beat, go → went. Sports pages are written in this tense — every result is past.

THE EXAMPLE · 例句

« Maxey scored more points than Brunson. » — comparison and past simple in one line (page 4).

LEVEL B2 · 挑戰

HEADLINE PRESENT

Headlines speak of yesterday in the present : « 76ers win opener », « Early voting opens in Texas ». The present simple makes old news feel live. Read the front page again and find three.

WHETHER = IF ?

« Nobody knows whether the Brewers can finish the story. » Whether introduces an open question inside a sentence — more elegant than if, and safe everywhere. It is the word of the deep read (page 6).

THE EXAMPLE · 例句

« Voting is no longer a day ; it is a season. » — no longer = 不再 (page 6).

THE TOOLBOX · 工具箱

Three sentences to keep in your pocket, one for each level :

A2 — « It's a quarter to eight. »

B1 — « The 76ers won, and Maxey scored more than Brunson. »

B2 — « Nobody knows whether the story ends with a trophy. »

And the newspaper reflex : every phrase of the week comes from an article of this issue. Re-read the article, and the phrase becomes easy.
